

Fazal Jamadar

DATA ENGINEER

✉ fazal.jam@gmail.com | [in fazaljamadar](#) | 📍 London, UK

Results-driven Data Engineer with 5+ years of experience designing large-scale data platforms, building robust ETL pipelines, and optimising data workflows. Skilled in Python, SQL, AWS, data modelling and data visualization (Power BI, Tableau). Adept at transforming raw data into actionable insights to drive business decisions. Passionate about automation, cloud technologies, and scalable data architectures.

Work Experience

Global Banking School

London, UK

DATA AUDIT ENGINEER

Jan. 2024 — Current

- Cleaned and processed large datasets from **CRM, APIs**, and multiple data sources
- Conducted in depth analysis using **Amazon Quicksight, PowerBI** to identify trends in student records and financial transactions
- Utilized Excel for ad-hoc data analysis, creating pivot tables, dashboards, and reports to support business teams
- Automated **ETL** workflows using **AWS Glue, SQL, Python** to streamline data ingestion and transformation across departments
- Ensured data accuracy and consistency through regular audits, validation rules, and proactive data quality checks
- Queried large-scale datasets using **Amazon Athena**, enabling serverless, cost-efficient analytics and integration with reporting tools like **QuickSight**
- Designed and presented data driven reports to senior management, aiding strategic decision-making

Genpact

Bangalore, India

DATA ENGINEER

Oct. 2022 — Oct. 2023

- Developed **AWS Lambda functions** with Boto3, improving data extraction and transformation efficiency.
- Managed **AWS Redshift** data warehouse, optimising storage and query performance by 40%.
- Conducted performance tuning for **PySpark** jobs and **SQL queries**, optimising resource usage and reducing cost on **AWS EMR** and **Snowflake**.
- Orchestrated ETL workflows using **AWS Step Functions**, ensuring seamless data processing.
- Implemented **AWS SNS & SQS** for event-driven messaging and pipeline notification.
- Automated data ingestion with **AWS Glue and Crawlers**, streamlining data cataloging.

Capgemini

Bangalore, India

DATA ENGINEER

Sept. 2021— May. 2022

- Developed **web scraping** scripts in Python for competitive price analysis
- Designed and executed **ETL pipelines** using **AWS Glue and Athena** for data transformation
- Automated **Airflow workflow** for scheduled data processing
- Created interactive dashboards in **AWS QuickSight and PowerBI**

ITT Star Global Private Limited

bangalore, India

ASSOCIATE DATA ENGINEER

Nov. 2020 - Sep. 2021

- Migrated data from on-prem databased to **Redshift** and **S3** using optimised **ETL processes**
- Built event-driven **AWS lambda functions** for real time data transformations
- Build a **machine learning model** on **AWS Sagemaker** to predict diabetes onsite
- Used **OCR(Tesseract)** for automated data extraction for mechanical drawings

Education

University of Essex

Colchester, United Kingdom

MSC IN ARTIFICIAL INTELLIGENCE

Oct. 2018 - Mar 2020

VTU

India

BACHELORS IN ELECTRONICS AND COMMUNICATION

June. 2013 - May. 2016

Skills

Languages

Python, SQL, C++, PySpark

AWS Cloud

Glue, Athena, Lambda, S3, EC2, SNS, SQS, Step Functions, EMR, Redshift, Kinesis, RDS, IAM, Sagemaker

Databases

Redshift, Postgres, Oracle, SQL, MySQL, DynamoDB, MongoDB, Snowflake

Data Visualisation Tools

Tableau, PoweBI, dbt(data build tool), Airflow, Quicksight, Seaborn, Matplotlib

IDE

Jupyter Notebook, Pycharm, Visual Studio, Spyder
